

# Don't miss an incredible opportunity to promote your organization to the global marine shipping industry!

This June, the Chamber of Marine Commerce (CMC) will co-host the Shaping the Future of Shipping Summit in Montreal in partnership with the International Chamber of Shipping (ICS). This annual event brings together influential international shipping organizations from almost 40 countries to facilitate business development and collaborate on key industry issues. To encourage networking, the summit begins on June 12 with a Tour and Gala that not only entertains participants, but creates an ideal environment for sponsors to showcase their brand and increase global awareness of their operations!
